

1. Download the free WARDJet wireless pendant app from the Android market.

Download Method 1:

- a. Click the Market icon to open the Android app market from your Android device.
- b. Search for "WARDJet".
- c. Click "WARDJet Pendant".

Download Method 2:

- a. Open Ikuhlu on the X-Series Controller.
- b. Log in as an admin level user.
- c. Open the Control Panel.
- d. Click the "Configuration" button at the top of the screen.
- e. Click "Wireless Pendant Options".

- f. Use the Barcode Scanner app to scan the square QR code which appears on the screen. This Barcode Scanner app can be downloaded from the Android app market for free.

- g. Open the link which will automatically direct you to the WARDJet Pendant app in the market.
2. Click "Download".
  3. Click "Accept and Download".
  4. Click "Install".

5. Click "Open" to open Ikuhlu on your Android device.
6. Open Ikuhlu on the X-Series Controller.
7. Log in as an admin level user.
8. Open the Control Panel.
9. Click the "Configuration" button at the top of the screen.
10. Click "Wireless Pendant Options".

11. Type the Activation Code that you received from WARDJet Sales into the "Activation Code" box.

12. Click "Activate".
13. A square QR code will appear.
14. Click the "Open Camera" button in the Ikuhlu app on your Android device.  
*Note: If the free Barcode Scanner app has not been downloaded to your Android device yet, the WARDJet Pendant app will automatically direct you there at this point. The Barcode Scanner app is necessary to set up the connection between your wireless device and the controller.*
15. Scan the code by centering it in the screen of your Android device using the camera.
16. Your wireless pendant is now ready to be used.  
*Note: Confirm that the Wireless Pendant button on this screen is green. When green, the controller will search for a wireless pendant. If the button is off, then the wireless pendant will not be usable.*
